

HOMER Meeting  
February 3-4, 2015  
Cagliari, Italy

1. HOMER project was a positive experience
2. LCA fully participated in the project's meetings and deliverables
3. Through the HOMER project we have raised the awareness about open data infrastructures in Malta
4. The LCA has held meetings with MITA and provided the entity with the Open Data Action Plan
5. MITA does not have the development of Open Data Strategy as one of its priorities
6. Through the public meetings we organised, we also engaged the support of the Faculty Information and Communications Technology
7. The LCA established a mini open data portal using CKAN software
8. The LCA organised a hackathon at the University of Malta. The students that took part understood the economic use of open data since they were requested to create apps with a commercial value
9. The UoM is also planning to introduce open data topic as part of its curriculum.
10. Overall the experience has been positive and we thank the LP and all the partners for giving us the opportunity to participate in the project.
